

Compelling,
creative and
persuasive
trial graphics
and animations.

ALWAYS ON. ALWAYS THERE.

A picture is worth a thousand words.
This adage holds especially true at trial.

People retain 80% of what they see, but only 10% of what they hear. Our experienced Graphic Design team can help tell your story visually by integrating years of trial research with our graphic design expertise to deliver compelling and effective graphics that the jury will understand, retain and believe. From illustrations to 2D and 3D animations, charts, graphs, photography, videography, timelines and more, we can do it for you.

Our experience from both the defense and plaintiff perspectives gives us a unique and well-rounded approach from which to develop your visual strategy.

2D and 3D animation/computer models

Technology tutorials

Illustrations

PowerPoint presentations

Video production and editing

Trial presentation database creation

Video deposition production

On-site graphics support

Trial presentation database creation

Expert Design for Presentations that Resonate

Our consultants and designers implement the principles of information design to bring clarity to your presentations so jurors can navigate and understand the facts. We consider how decision makers process information as well as how information is filtered through individual attitudes, values and experiences. We are particularly sensitive to how decision makers learn - where they seek more visual information and how to visually present that information to resonate most effectively.

We've produced 6,000,000+ trial graphics...

Been there. Done that.
